TECHNICAL SKILLS

Languages: C++, Python, JavaScript
Frontend: React.js, Next.js, Tailwind CSS, Redux
Backend: Node.js, Express.js, FastAPI, GraphQL
Database: MongoDB, PostgreSQL, SQLite, MySQL, Prisma
Tools: Git, Docker, Kafka, Figma, Bootstrap, ShadCN

EDUCATION

SCTR's Pune Institute of Computer Technology **Sept 2023 – June 2027**
B.E. in Computer Engineering – CGPA: 9.85 Pune, Maharashtra

EXPERIENCE

TCS Innovation Labs **June 2026 – Aug 2026**
Summer Intern | Certificate Mumbai, Maharashtra

- Collaborated in agile sprints to develop a scalable data architecture for the ingestion and retrieval of healthcare data, optimizing it for machine learning algorithm processing.
- Engineered scalable backend services using **Node.js** and **GraphQL**, and containerized the architecture with **Podman** for deployment on Azure.
- Implemented an event-driven architecture utilizing **Kafka** to decouple system components.

Agribid Private Limited **Jan 2026 – April 2026**
Full Stack Developer Intern | Certificate Remote

- Architected a secure middleware platform using **FastAPI** to ingest, process, and route agricultural data from the national **AgriStack** portal.
- Implemented API key authentication and role-based access control (**RBAC**) to enforce data authorization and security policies across client integrations.
- Engineered a management dashboard using **Next.js** and **Tailwind CSS**, paired with **SQLite** for metadata storage and credential tracking.

PROJECTS

SyncGrid GitHub | Video
Next.js | Tailwind CSS | Supabase | PostgreSQL | Tiptap

- Built a collaborative project management platform using **Next.js** and **Tailwind CSS**, enabling seamless multi-user concurrency.
- Integrated **Supabase** and **PostgreSQL** for backend operations, leveraging **Supabase Realtime** for live cross-client synchronization.
- Implemented a rich text collaborative editor with **Tiptap**, secured with **Supabase Auth** and RBAC for workspace permissions.

Giripremi GitHub | Video
React | FastAPI | MySQL | REST APIs

- Built an end-to-end inventory management platform using **React**, **FastAPI**, and **MySQL** to streamline gear rentals and adventure equipment tracking.
- Engineered performant REST APIs and normalized relational schemas to automate gear check-in/out workflows, track stock, and monitor equipment health lifecycles.

SamudraWatch Video
React | Leaflet | Redis | REST APIs

- Developed an ocean hazard analysis platform aggregating data from manual reports and real-time social media.
- Implemented caching to optimize data retrieval for frequently accessed map regions, reducing API latency by **60%**.
- Built an interactive geospatial dashboard using **Leaflet** to visualize hazard markers and cluster incidents.

ACHIEVEMENTS

- Achieved global rank of **1298** in **Meta Hacker Cup Round 2**
- Achieved **Knight** badge with a maximum rating of **1860** on **LeetCode**
- Achieved a maximum rating of **1641** (3 Stars) on **CodeChef**
- Shortlisted for the **Odoo Hackathon**

CERTIFICATIONS

Oracle Cloud Infrastructure 2025 Foundations Associate (1Z0-1085-25) Oracle
